KETIV

**Verbal Identity
Brand Guidelines**

Brand Voice

Introduction

Our brand voice is the unique linguistic signature of our company. It describes what to say about KETIV, and how to say it.

It is an important resource for those tasked with developing content and messaging in a way that is consistent, coherent, and distinctive.

That said, the ability to be flexible in deference to context, audience, and/or delivery medium is also important. For that reason, this is a resource that requires a level of judgment on the part of users.

Our Name

Ketiv means “to be written”, or in other words, what should be copied to preserve accuracy.

At KETIV we build strong relationships that are based on trust. We earn this trust by providing value and meeting commitments.

Brand Voice**Our Purpose***Why we exist*

Our purpose statement explains the reason we exist. It is motivational and put our employees into our customer's shoes. It needs to inspire our staff to do their best work and find a way to express the impact we can have on the lives of our customers. Make them feel it.

Our purpose guides our actions, and is a purpose we enthusiastically embrace.

KETIV empowers today's innovators and manufacturers for a better tomorrow.

Brand Voice**Our Vision***What we aim to achieve*

This is what we want to achieve and become. A vision is a seeing term. Therefore, our vision statement is future-oriented. It's an image of what we want to create and become. Our vision statement should inspire and motivate decision-making.

KETIV will play a leading role in reimagining American manufacturing while becoming the nation's most desired & revered consultant.

Brand Voice

Our Mission

How we plan to achieve our vision

Our mission statement outlines how the we plan to achieve our vision.

To make our partners more competitive and successful through essential guidance, technology & support.

Brand Voice**Brand Personality & Tone**

Our brand voice reflects our personality and identity and should be consistent across all content. Tone on the other hand, can, and should, adapt according to the context of the content.

For example, a humorous tone on a welcome page can build likeability and loyalty, but in a warning message, it can result in exactly the opposite.

KETIV is knowledgeable, confident, caring, & dependable.

KETIV is not arrogant, brash or entitled.

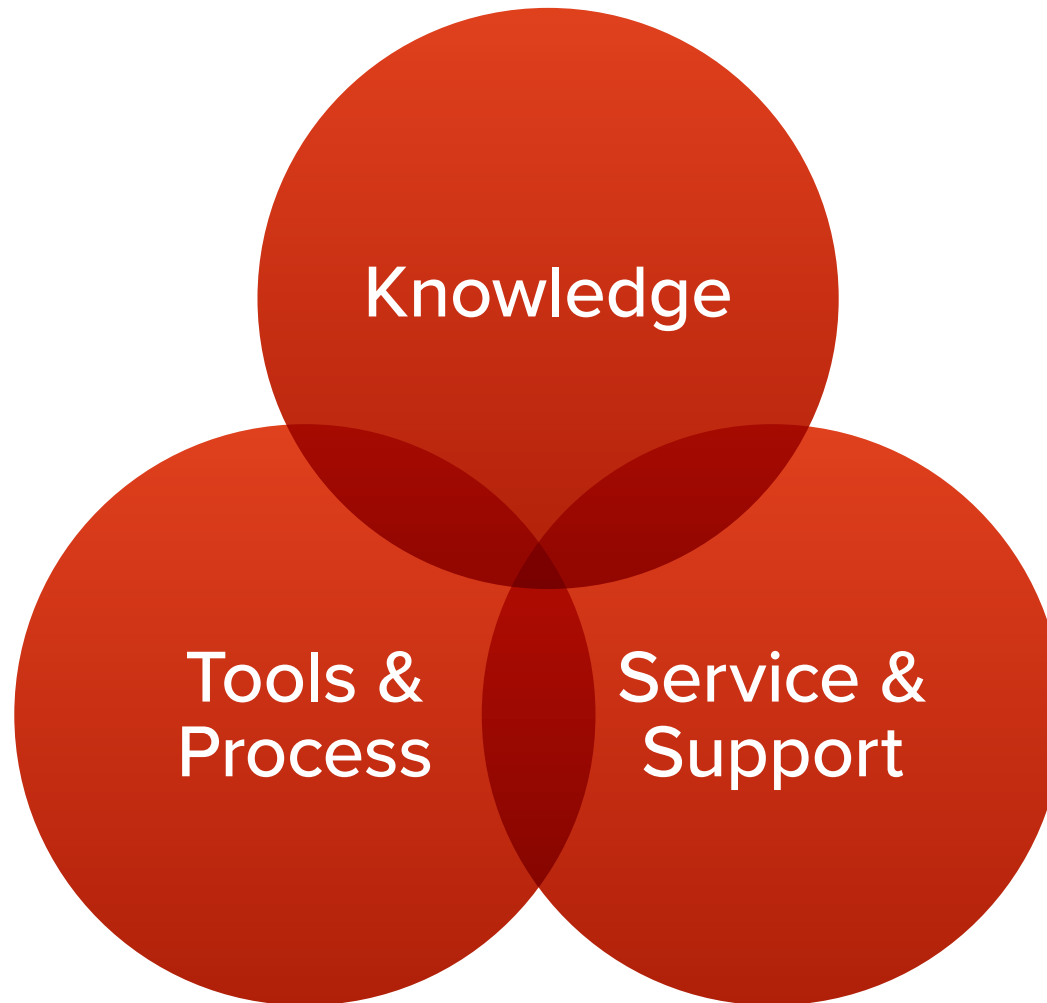

Brand Voice**Brand Attributes**

Just as with the humans within our business, our brand personality describes the way our brand speaks, behaves, thinks, acts, and reacts. It is the personification of the brand - the application of human characteristics to our business.

Accountable**Adaptive****Authentic****Confident****Empathetic****Experienced****Humble****Innovative****Knowledgeable****Optimistic****Resourceful****Team-oriented**

Brand Pillars

Our Brand Pillars are the defining strengths of our company. They are memorable, and function as a guide for our internal team.

Manifesto

Our brand manifesto is much more than a catchy way of identifying what makes KETIV unique. It's our plan for a better world, a declaration of independence, and a moral compass that will guide and define our brand.

Because knowledge should be shared.

Because dependability is rare in this world.

Because doing something well is its own reward.

Because guiding others to greatness is a privilege.

Because we believe in the builders of a better tomorrow.

WE ARE KETIV.

KETIV

**Visual Identity
Brand Guidelines**

Our Logos

Introduction

The cornerstone of our visual identity is our logo and it should be easily recognizable everywhere it is used. Consistency is the key to this and the reason that our logo should never be altered in any way.

For maximum impact the red logo should be placed on a white background or the white logo on a red background. The white logo can also be placed on a black background, but only if a red background is not an option.

In situations where our logo must sit on a full colour image, the cube version can be used to ensure the KETIV logo maintains strong visibility and recognition.

Positioning

There is flexibility, but as a general rule, aim to place the KETIV logo in the top left corner of a layout.

Incorrect Use

Incorrect use of the KETIV logo compromises it's integrity and effectiveness. Our range of logos make our identity more dynamic and flexible than most corporate identities, however there are still some things that are not allowed:

- Do not change the colour of a KETIV logo.
(Don't change anything, in fact).
- Do not add effects, like glows or drop shadows.
- Do not rotate, flip, skew or disproportionately scale.

Important

You should never recreate any KETIV logo.
Always use the logo files that are provided by KETIV.

Our Logos

Protecting our logos

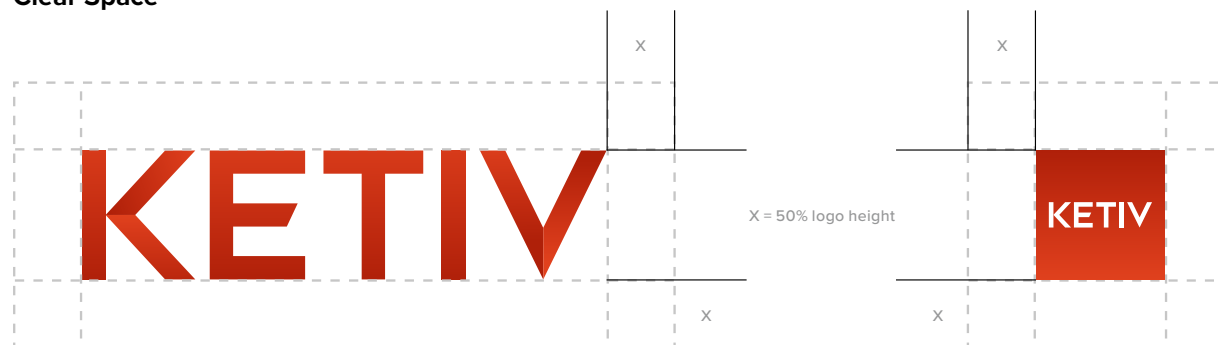

Clear Space

To preserve the integrity of the KETIV logo, always maintain a minimum clear space around the logos. This clear space isolates the logo from competing graphic elements such as other logos, copy or photography that may divert attention.

As illustrated on this page, the clear space for the KETIV logos is measured at 50% of its height.

*The only exception to this rule is the proximity of our Brand Idea to the KETIV logo. (See next page).

Clear Space

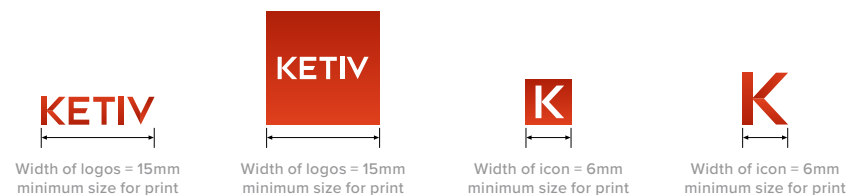

Minimum Sizes

At any size, the KETIV logo should be easily recognizable everywhere it is used.

The KETIV logo retains its visual strength in a wide range of sizes. However, when the logo is reproduced too small, it is no longer legible and its impact and recognition is diminished.

For print applications, the KETIV logo should never be reproduced in a width smaller than 15mm. When it is not possible to use the Primary or Cube logos 15mm wide or larger, the Icon logo can be used but must not be reproduced in a width smaller than 6mm.

Minimum Sizes

Important

You should never recreate any KETIV logo.
Always use the logo files that are provided by KETIV.

Our Brand Idea

At the heart of our brand is our Brand Idea
'Manufacturing Innovation. Together'.

It's more than a corporate Brand Line, it's an attitude and the idea that defines us. It captures the vibrant thread of energy running through every aspect of our business, inspiring us to always look for better ways to have a positive impact on our clients, industry and world around us.

Our Brand Idea is distinct and evokes an emotional connection both internally and externally. This idea also connects to why we exist, what we aim to achieve and how we plan to achieve it:

Our Purpose

KETIV empowers today's innovators and manufacturers for a better tomorrow.

Our Vision

KETIV will play a leading role in reimagining American manufacturing while becoming the nation's most desired and revered consultant.

Our Mission

To make our partners more competitive and successful through essential guidance, technology and support.

Important

You should never recreate the KETIV Brand Idea lock-up with our logo. Always use the files that are provided by KETIV.

Our Typography

Meet Proxima Nova

The Proxima Nova family is a complete reworking of Proxima Sans (1994). The original six fonts (three weights with italics) have been expanded to 48 full-featured OpenType fonts.

Stylistically, Proxima Nova straddles the gap between typefaces like Futura and classic sans faces. The result is a hybrid combining humanistic proportions with a somewhat geometric appearance.

Important

Design software allows you to calculate point size and leading automatically by typing in the percentage required in the point size or leading field.

For leading, always make sure that the leading is the same as the point size before typing in the required percentage.

For simplicity, point sizes can be rounded up to the nearest decimal point.

KETIVManufacturing Innovation. **Together.**

Space before is 100% of
headline point size

Headlines are Proxima Nova Extra Bold with leading that is 100% of point size

Space before is 100% of
body copy point size

Body Copy is Proxima Nova Medium that is 50% of the headline
point size with leading that is 120% of point size

Space before is 200% of
call-to-action copy point size

Call-to-action is Proxima Nova Bold that is 55% of the headline
point size with leading that is 120% of point size

Kerning

Kerning on all type should be set to 'optical'.

Our Colours

The KETIV colour palette is made up of 2 primary colours along with a gradient comprised of the two.

Red is at the heart of our brand. We use it to express our authenticity, confidence and passion.

Primary Colours

The strongest impression of the our brand comes from our primary colour palette. Our Primary Reds and Gradient are hero colours and lead our communications.

Secondary Colours

Our support colours round out and balance our colour use across all communications. KETIV Grey and White are widely used to represent our modern, contemporary and professional business.

Tertiary Colours

Our Blue palette is most often associated with KETIV AVA but these colours can also be used sparingly as a complement to our strong range of Red. Combinations of Tertiary colours can also be used to create a range of gradient blends.

Our Imagery

Primary Imagery: Services

How we help - people & environments

Our imagery system serves our mission to make our partners more competitive and successful through essential guidance, technology and support.

With primary imagery, visual stories are focused around our customers and our team working together in realistic scenarios. These scenarios should cover a range from consultancy at a boardroom level, to face-to-face computer training scenarios, through to working together on the factory floor.

The following images are to be used as guidance for photo shoots or selection of stock photography.

The flexible photography system visualizes broader settings where the camera has pulled back to reveal their environment. The crop of the image should strike the balance between how we help people and the environments where we do this.

A consistent colour grading will be applied to all imagery to be recognisable as KETIV imagery. Hints of red will be used where possible to reflect our brand colour. When directing and selecting imagery, diversity will be a focus to represent our customers and team.

Monitors

Whenever we see a monitor in images be sure to add dynamic screenshots from our software collection. Always feature the colour red when possible.

Imagery Disclaimer

Apart from references to partner imagery, the imagery used throughout this document is intended for purposes of illustration and inspiration only and should not be reproduced or replicated in any format under any circumstances. The purchase of relevant usage rights is required.

Download the KETIV Colour Lookup here

Our Imagery

Secondary Imagery: Real People *Our team & clients*

Our imagery system serves our mission to make our partners more competitive and successful through essential guidance, technology and support.

Our secondary imagery focusses on real images of our team and clients in realistic scenarios. People can be shot as individuals or the focus of group scenarios. The camera should capture people in a relaxed, realistic scenario that is a true, yet ideal, representation of the working environment.

The following images are to be used as guidance for photo shoots and the main difference in composition between these and primary photography is that these more up-close and intimate 'hero moment' portraits.

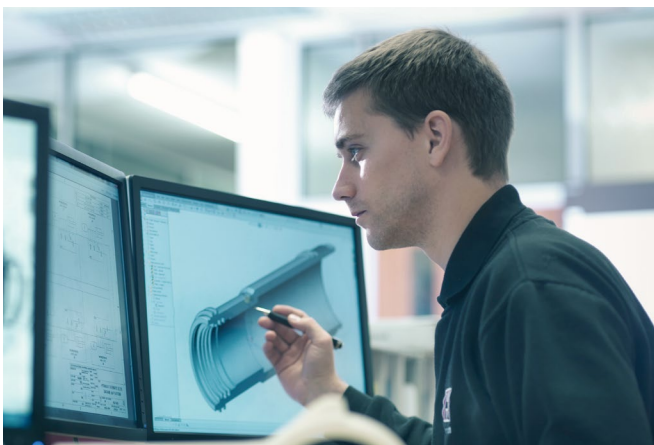

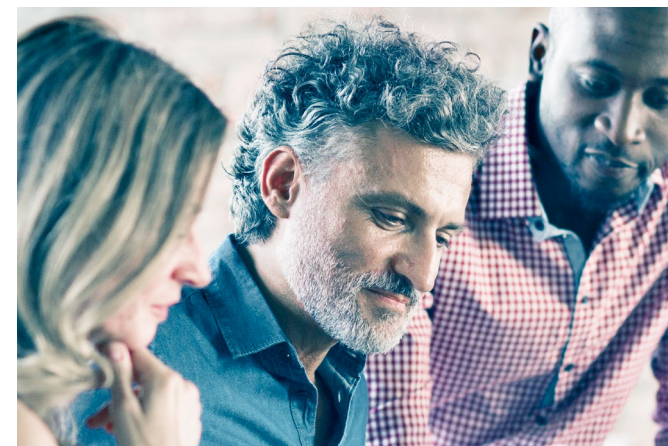

A consistent colour grading is applied to all imagery to be recognisable as KETIV imagery. Hints of red will be used where possible to reflect our brand colour. When directing and selecting imagery, diversity will be a focus to represent our customers and team.

Monitors

Whenever we see a monitor in images be sure to add dynamic screenshots from our software collection. Always feature the colour red when possible.

Imagery Disclaimer

Apart from references to partner imagery, the imagery used throughout this document is intended for purposes of illustration and inspiration only and should not be reproduced or replicated in any format under any circumstances. The purchase of relevant usage rights is required.

Our Imagery

Tertiary Imagery: Products

Software products & client products

Our imagery system serves our mission to make our partners more competitive and successful through essential guidance, technology and support.

Product imagery is used to inspire and illustrate our customer's full process of concept through to finished product.

The following images are to be used as guidance for photo shoots or selection of stock or partner photography.

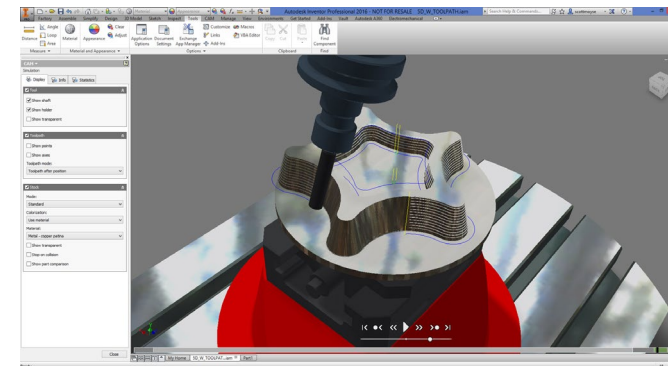

A consistent colour grading is applied to all imagery to be recognisable as KETIV imagery. Hints of red will be used where possible to reflect our brand colour.

Monitors

Whenever we see a monitor in images be sure to add dynamic screenshots from our software collection. Always feature the colour red when possible.

Our Imagery

Big Picture Imagery

World & human impact

Our imagery system serves our mission to make our partners more competitive and successful through essential guidance, technology and support.

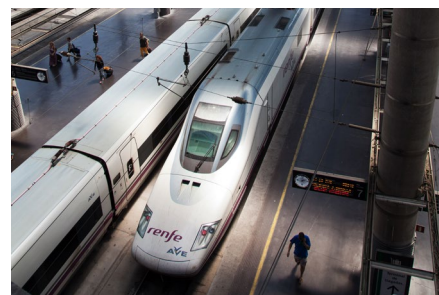

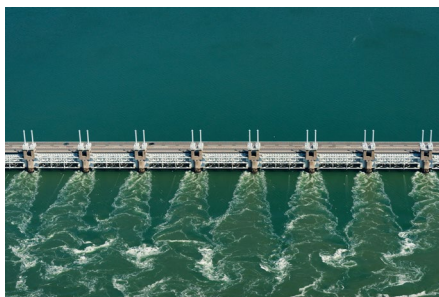

Inspirational, big picture imagery is used to zoom way out for the wider impact that KETIV and our customers can have on the world at large. This can be original photography that documents the social programmes we organise and are a part of, through to more conceptual imagery that represents our wider impact. The images here illustrate the range from wider, environmental impact, down to impact on a human level. This aspect of our photography illustrates our purpose of **empowering today's innovators and manufacturers for a better tomorrow.**

The following images are to be used as guidance for photo shoots or selection of stock or partner photography.

A consistent colour grading is applied to all imagery to be recognisable as KETIV imagery. Hints of red will be used where possible to reflect our brand colour. When directing and selecting imagery, diversity will be a focus to represent our customers and team.

Imagery Disclaimer

Visual Elements

Primary Elements

Our primary visual elements are the tools that help build a cohesive image collection with strong recognition and impact. They will help define what a KETIV image looks like.

Colour Grading Tips

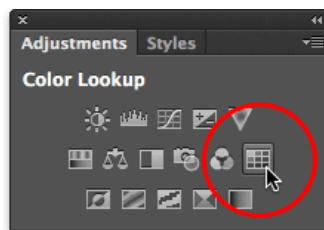

For images with existing colour adjustments or corrections, try to neutralise colours and levels before applying the KETIV Colour Lookup.

In Photoshop, 'Create new fill or adjustment layer' can be found at the bottom of the 'Layers' window. 'Colour Lookup' can be selected from that menu. Search for the KETIV Colour Lookup that you've downloaded and it will be applied to the image.

Important

You should never recreate the KETIV Visual Elements. Always use the files that are provided by KETIV.

Colour Grading

We have produced a Colour Lookup that gives all KETIV imagery a similar look and feel. This is to maintain consistency across all of our imagery, no matter it's source. The KETIV Colour Lookup profile is available to download.

*The only time that this would not be used is on partner imagery that infringe on their imagery guidelines (ie Autodesk brand imagery)

K Arrow

Our KETIV Arrow is based on the typographical 'arm' and 'leg' of the K in our logo. This is our visual element hero and brings focus and attention to the primary element in our photography. In addition to focus, this brings depth and dynamism to our imagery. Our Arrow can be placed anywhere on the image but should wrap around the primary element in the image and symbolizes the effect that our services and products have on our customers' business and on the world around us.

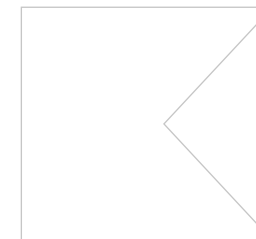

Gradient

Our gradient brings strong brand recognition and attention to our imagery. For positioning reference, the gradient is always anchored to our K Arrow. Exactly half of our K Arrow should overlap our gradient. Our Gradient should always be set to 100% fill and 'multiply' blending mode.

White Crop

Our White Crop adds flexibility to any layout while still ensuring that our imagery remains consistent and recognizable. It can overlay the Gradient in any way and can be used at any scale. It should crop the Gradient below it (we don't want to see any red underneath it) and can be filled with 90% white for overlaid type legibility, while still allowing any image below to be visible.

*The outline stroke on the White Crop is for illustrative purposes only and should not be included in artwork.

Download the KETIV Colour Lookup & Visual Elements here

Visual Elements

Element Usage

Because our KETIV Design Elements are intentionally flexible, here is further explanation and examples of how they can be used together.

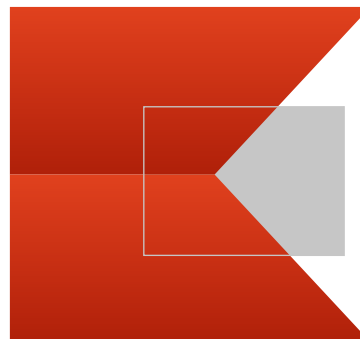

First we have illustrated how the primary elements have been used and cropped in the example layout from the previous page.

Below that are some additional examples of the positioning and use of the primary elements. The red and the white areas can both be used for supporting copy.

K Arrow

Gradient

White Crop

Image Example

Visual Element Usage Examples

Download the KETIV Colour Lookup & Visual Elements here

Visual Elements

Usage Hierarchy

It makes sense that on assets with one image, like a poster, we would use all of the previous Visual Elements that make up a KETIV image.

But what about assets with multiple images? Like a brochure or website? As a rule of thumb, only one focal image per 'page' would use all Visual Elements.

From that point forward, what we use on KETIV images will depend on their importance on that page.

Subsequent images could choose to use the range of KETIV gradients in different ways but this should not be overused.

Minor or support images should use the Colour Grading only.

Colour Grading Reminder

The only time that KETIV Colour Grading would not be used is on partner imagery that infringe on their imagery guidelines (ie Autodesk brand imagery)
